

cop5536::rb_tree< int,
float >::insert

cop5536::rb_tree< int,
float >::join_

cop5536::rb_tree::insert_

```
graph LR; A["cop5536::rb_tree< int, float >::insert"] --> C["cop5536::rb_tree::insert_"]; B["cop5536::rb_tree< int, float >::join_"] --> C;
```

The diagram illustrates a function mapping. On the left, two white rectangular boxes represent source functions: 'cop5536::rb_tree< int, float >::insert' (top) and 'cop5536::rb_tree< int, float >::join_' (bottom). On the right, a gray rectangular box represents the target function: 'cop5536::rb_tree::insert_'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions are mapped to the same target function.
